

Somos® GP Plus 14122

The universal resin

Somos® GP Plus 14122 mirrors production plastics like ABS and PBT, making it an ideal choice for virtually any application.

- ⊕ Excellent durability
- ⊕ Superior strength
- ⊕ Outstanding durability

Recognized for its durability, accuracy, as well as water and humidity resistance, Somos® GP Plus 14122 is a sought-after resin among designers in the automotive, aerospace and consumer product industries.

This resin creates highly functional prototypes, concept models and low-volume production parts. It's easy to integrate into the production cycle, making your products available much faster.

Ideal for a variety of applications

Somos® GP Plus 14122 helps our customers produce more durable prototype parts than those made with standard SL resins. They are ideal for a variety of applications including:

- Electronic Covers
- Consumer Packaged Goods
- Snap-fit Designs

Solutions for many industries

Regardless of what industry you're in, new product developers rely on high-performance prototypes to test their design concepts. As a world leader in stereolithography material innovation, DSM has a Somos® solution for just about any industry. Somos® GP Plus 14122 helps our customers produce durable prototype parts. It is perfect for:

Aerospace

Automotive

Consumer Goods

Design

Industrial

Motorsports

Why Somos® Materials?

DSM is a global stereolithography materials provider committed to helping our clients design whatever their imaginations can create. Through collaborative partnerships and groundbreaking materials innovation, we're pushing the boundaries of possibilities to deliver brighter lives for generations to come.

Since the late 1980s, DSM's Somos® group has earned a global reputation for stereolithography material innovation. Prototypes made from Somos® resins closely replicate the functionality of engineered thermoplastics, but are delivered with increased speed and accuracy.

We are continually advancing the performance benefits of our extensive line of Somos® materials. You'll find a solution for just about any stereolithography application.
